OUTSIDE THROTTLE IS MAKING A HIT WITH ENGINEERS

Santa Fe Engineers Pleased With New Device Invented By W. F. Buck, Superintendent of Motive Power.

Although there are as yet no engines on the local divisions equipped with the Buck outside throttle, there is considerable interest being taken by local men, and the following report by an engineer who made a trip for the purpose of reporting on the device is of interest to all railroad men or mechanics.

The Throttle's Advantages.
In the usual locomotive practice the throttle is in the dome. In its usual location the throttle is inaccessible and in case of accident to the throttle or necessary repairs much time is expended in getting at it. Steam pressure has to be reduced or the boiler has to be "blown off" in the vicinities of the railroad man, before a man can enter the boiler and work on the repair of the throttle. The only access to the boiler in this case is through the dome in which the throttle is located.

For a man to get into the boiler, the dome must be opened and the throttle removed, all requiring time and labor. The "external" throttle is located outside of the boiler, very close to the cylinders. It not only overcomes the undesirable features of the old form of throttle but by virtue of the throttle being closer to the cylinders the control of the locomotive by the engineer is more delicate.

So far the use of the Buck

SHE HAD CONSTANT PAIN

Until Relieved by Lydia E. Pinkham's Vegetable Compound.

Dewittville, N.Y.—"Before I started to take Lydia E. Pinkham's Vegetable Compound I suffered nearly all the time with headaches, backaches, and bearing down pains, and had a continuous pain in my left side. It made me sick if I tried to walk much, and my back was so weak that I was obliged to wear crutches all the time. But now I do not have any of these troubles. I have a fine strong baby daughter now, which I did not have before taking Lydia E. Pinkham's Vegetable Compound."—Mrs. A. A. GILLES, Route 44, Dewittville, N.Y.

The above is only one of the thousands of grateful letters which are constantly being received by the Pinkham Medicine Company of Lynn, Mass., which prove beyond a doubt that Lydia E. Pinkham's Vegetable Compound, made from roots and herbs, actually does cure these obstinate diseases of women, and that every such suffering woman owes it to herself to at least take Lydia E. Pinkham's Vegetable Compound a trial before submitting to an operation, or giving up hope of recovery.

Mrs. Pinkham of Lynn, Mass., invites all sick women to write her for advice. She has guided thousands to health and her advice is free.

SALT LAKE USES PICKLE TIES

Leaves Timbers in Great Salt Lake for Term of Years, While Minerals Impregnate Fibers of Wood.

Salt Lake City, Utah, Nov. 20.—A great many novel means have been devised of increasing the usefulness and length of life of railroad ties, but probably none more novel than that in use by the Salt Lake line, which utilizes nature's great reservoir of minerals in watery solution as a wood preservative plant.

Ten thousand railroad ties that have been "pickled" in Great Salt Lake, Utah, for the last three years, have just been removed from that body of highly mineralized water and are now being transported to Hazen, Nev., there to be given a trial on the new Hazen cut off of the Southern Pacific company. "Pickling" is by no means a new experiment on the part of the railroad company.

There are ties in the old Promontory line of the Central Pacific railroad that were placed there forty years ago and have not decayed, proving the preservative qualities of the salt formation in which they "pickled" for years before being laid in the roadbed. Piling is also being preserved in this lake as excellent results have been obtained by the piling in the great lake, across the lake, which, since the day it was first placed in the first part of the construction of the Lucin cut off, has shown no deterioration.

The ties that have just been removed from the Great Salt Lake will be subjected to a hard test in the alkali soils of Nevada. The "pickling" process has caused them to become heavily impregnated with salt and they act as a "ground" to the electric current in the block signal system. This fact makes them unfit for use on the main line of the company over which the block signals play a most important part.

The preserving of ties and piling in Great Salt Lake may become an important industry if the experiments now being worked out prove as successful as former tests.

A TREACHEROUS TROUBLE.

Albuquerque People Are Shown the Way Out.

Kidney diseases are very dangerous. They come on silently, gain ground rapidly, and cause thousands of deaths that could have been prevented by proper treatment in the beginning. Nature gives early warnings of kidney disease—backache, twinges of pain when stooping or lifting, headaches and urinary disorders. If these symptoms are unheeded, there is grave danger of dropsy or fatal Bright's disease. Doan's Kidney Pills have earned a reputation for their effectiveness in kidney troubles, and are known and recommended throughout the world. Albuquerque readers should find convincing proof in the following statement. It's from a citizen of this locality.

Jacob Kenestrick, 766 Lincoln avenue, East Las Vegas, N. M., says: "My opinion of Doan's Kidney Pills which was publicly expressed in a testimonial I gave in their praise two and a half years ago remains unchanged. Whenever I have taken Doan's Kidney Pills, they have given me relief from annoying symptoms of kidney complaint. I am glad to give this remedy the praise it deserves." For sale by all druggists. Price 50c. Foster-Milburn Co., Buffalo, N. Y., sole agents for the United States.

Remember the name—Doan's—and take no other.

GRAY HAIR MAKES YOU LOOK OLD

A Simple Remedy Brings Back the Natural Color; Dandruff Quickly Removed.

How often one hears the expression, "She is gray and beginning to look old." It is true that gray hair usually denotes age and is always associated with age. You never hear one referred to as having gray hair and looking young.

The hair is generally the index of age. If your hair is gray, you can't blame your folks for referring to you as looking old. You can't retain a youthful appearance if you allow your hair to grow gray. Many persons of middle age jeopardize their future simply by allowing the gray hair to become manifest. If your hair has become faded or gray, try Wyeth's Sage and Sulphur Hair Remedy, a preparation which a chemist by the name of Wyeth devised a few years ago. It is simple, inexpensive and practical, and will banish the gray hairs in a few days. It is also guaranteed to remove dandruff and promote the growth of the hair.

It is a pleasant dressing for the hair, and after using it a few days, itching and dryness of the scalp are quickly dispelled.

Don't neglect your hair. Start using Wyeth's Sage and Sulphur today, and you will be surprised at the quick results.

This preparation is offered to the public at fifty cents a bottle, and is recommended and sold by all druggists.

SALT LAKE USES PICKLE TIES

Leaves Timbers in Great Salt Lake for Term of Years, While Minerals Impregnate Fibers of Wood.

Salt Lake City, Utah, Nov. 20.—A great many novel means have been devised of increasing the usefulness and length of life of railroad ties, but probably none more novel than that in use by the Salt Lake line, which utilizes nature's great reservoir of minerals in watery solution as a wood preservative plant.

Ten thousand railroad ties that have been "pickled" in Great Salt Lake, Utah, for the last three years, have just been removed from that body of highly mineralized water and are now being transported to Hazen, Nev., there to be given a trial on the new Hazen cut off of the Southern Pacific company. "Pickling" is by no means a new experiment on the part of the railroad company.

There are ties in the old Promontory line of the Central Pacific railroad that were placed there forty years ago and have not decayed, proving the preservative qualities of the salt formation in which they "pickled" for years before being laid in the roadbed. Piling is also being preserved in this lake as excellent results have been obtained by the piling in the great lake, across the lake, which, since the day it was first placed in the first part of the construction of the Lucin cut off, has shown no deterioration.

The "pickling" process has caused them to become heavily impregnated with salt and they act as a "ground" to the electric current in the block signal system. This fact makes them unfit for use on the main line of the company over which the block signals play a most important part.

The preserving of ties and piling in Great Salt Lake may become an important industry if the experiments now being worked out prove as successful as former tests.

BELEN WILL HAVE EMPLOYEES' CLUB

Supt. S. E. Busser of the Santa Fe Reading Rooms, Announces Important Step in Development of Town.

That the contracts for the erection of an employees' club house at Belen will be let some time this week was the statement made yesterday by Superintendent S. E. Busser of the Santa Fe reading room system. The new club house will accommodate fifty employees and will be modern throughout. The entire building will be of new construction and will have bed rooms, baths and general lounging rooms for half a hundred men. Every thing will be the best that money can buy. The total cost of the structure will be \$10,000.

"I'm going to let the contract this week, I guess," said Mr. Busser, "at any rate next week. Today, there are several contractors down at my office looking over the plans for the place. The place will be of frame construction with 5 rooms. I expect it to accommodate 50 employees. There will be two men assigned to every room. There will be ample facilities for baths and showers and, in addition, the general rooms, which will include smoking and lounging rooms will be furnished comfortably. We will have some extra quality food tables there, too, and everything that we can do to make the men more comfortable will be done. The whole building will be new throughout. There is an old building down there that I am going to use as a sort of vestibule, temporarily, but the clubhouse itself will be new."

Mr. Busser renewed the statement made some time ago, that the Ancho Glee club would open the season for entertainments here about the middle of December. He left last night for San Francisco.

"How did that story pan out about the man up in the Bronx who found the big halibut on his back stoop this morning?" asked the city editor.

"Nothing in it," replied the reporter. "He discovered it wasn't a halibut after all. The woman left it there."

WANAMAKER THINKS LADIES SHOULD QUIT DRINKING

Female of the Species Must Cut Out Booze and Cigarettes if She Would Remain More Deadly Than the Male

Philadelphia, Nov. 20.—The increasing number of women in this country who are both drinking and smoking in private and public, according to John Wanamaker, are a menace to the nation. The Republican party, or any other party, Mr. Wanamaker also asserted in an appeal for universal prohibition at the John Chambers Memorial Presbyterian church, that continues to ignore the liquor traffic is doomed. He took advantage of "Temperance day" celebration to make an appeal for the total abolition of the liquor traffic.

A delegation, headed by Mr. Wanamaker, from the Brotherhood of St. Andrew and Philip of Bethany church conducted special services.

"It is time something was done beside parading and singing 'Onward, Christian Soldiers,' said Mr. Wanamaker. 'We must now stand together for the total abolition of the liquor traffic, which is bound to come in time.'

"I believe the Republican party, or any other party, that fails to recognize this, is doomed. I am a Republican, and love the old party of Lincoln, Harrison, Grant, Garfield, and McKinley, but I realize that the grand old party cannot be kept up to its standard until it excludes the liquor business."

"It was difficult for me when I lived in Washington to entertain foreign officials without serving them strong drinks, but none of them ever got anything to drink at my house. I have been a teetotaler since 1877. In all these years I have not taken a single drink of liquor. I have never found that I missed anything by not drinking, and cannot see that anybody else could miss anything by not drinking."

"The appetite for strong drink is an appetite that grows. It is the devil's best weapon against the world's greatest curse. It is a favorite argument of manufacturers of liquor that there is more drunkenness in prohibition states than others. 'The greatest sorrow of intemperance is that women are now drinking and smoking, not only in private, but in public. It's a sad time when those we consider morally above us are heading for the drunkard's grave. I don't think it a pity that women can get strong drink in a drug store or dry goods store. They are tempted to buy it there because nobody will find it out. 'If we expect others not to drink we must not drink ourselves. Employees, especially, should not drink, if they expect their employees not to drink.'

BIGGEST FERRY BOAT IS CONTRA COSTA

Ship Which Carries Union Pacific Trains Across Strait in California Now Being Built Will Excel in Size.

San Francisco, Calif., Nov. 20.—The Southern Pacific company's steamer Solano which has ferried thousands of trains every year since 1879 across the Carquinez Straits between Port Costa and Benecia, California, and which has been known all of these years as the largest ferry boat in the world, is to lose its famous appellation. Its successor to the title will be the ferry steamer Contra Costa, now being constructed in the Oakland shipyards of the Southern Pacific.

The building of the old Contra Costa railroad across the great west and the steamer Solano are today two of the favorite topics of the California pioneers.

The Solano is not to be retired from service, however. Both the old and new boats will carry the transcontinental trains across the narrow straits that separate Carquinez and San Pablo bays.

The Contra Costa, while the general dimensions do not vary materially from those of the Solano, will be slightly larger. It is being constructed of Oregon pine and will be placed in service immediately upon its completion. The length of all will be 435 feet, 4 inches, and the width 114 feet. Its tonnage will be 2,800 tons. The most radical difference between this new steamer and the Solano will be the location of the engines. Instead of being propelled by one engine, located in the center of the boat, there will be two independent engines of 2,500 horsepower each, located below the main deck, one engine for each paddle wheel. Steam will be supplied from a dry-dock Scotch boiler.

There will be four parallel tracks, 12 feet centers, on the Contra Costa. These tracks will be absolutely straight on the deck of the boat, there being no deck houses in the center of the steamer to require a curve as on the Solano. Its capacity will be 36 freight cars and 2 locomotives, or 34 passenger coaches and two locomotives. The present apron and slips of both Benecia and Port Costa terminals will remain as they now are, the guard lines of the new steamer being identical with those of the Solano. The Contra Costa will be provided with a cafe and bar on the main deck, also a waiting room for local passengers.

In damp, chilly weather there is always a large demand for HALLARD'S KIDNEY LINIMENT because many people who know by experience its great relieving power in rheumatic aches and pains, prepare to apply it at the first twinges. Price 25c, 50c and \$1.00 per bottle. Sold by all druggists.

HERBERT PULTIZER TO CONTROL NEW YORK WORLD

But Ralph, His Elder Brother Will Hold the Reins Until He is of Age; Daughters' Bequests Raised.

New York, Nov. 20.—The will of Joseph Pulitzer, late editor and proprietor of the New York World, contains several provisions not made public in the preliminary statement issued Monday. The bequest to the Philharmonic society is in the following language:

"I give and bequeath to the Philharmonic society of the city of New York the sum of \$500,000 to be known as the Joseph Pulitzer bequest. I direct that the income of such fund be applied and used to perfect the present orchestra and place it on a more independent basis and to increase the number of concerts to be given in the city of New York, which additional concerts I hope will not have too severely classical programs and to be open to the public at reasonable rates; and to recognize in them my favorite composers: Beethoven, Wagner and Liszt."

In a codicil, dated London, January 17, 1910, the testator states that since his friend, Dumont Clarke, who had been appointed one of the trustees under the will, was dead, the appointment was "to go to Charles E. Hughes, now or recently governor of the state of New York."

The original will had bequeathed \$100,000 to Clarke in lieu of his commissions as trustee and the codicil gave the same sum to Justice Hughes. Owing to the declaration of Justice Hughes to act and the appointment of Supreme Court Justice Harrington to succeed him, it is understood that this sum now goes to his successor.

A codicil executed at Lancashire, England, on July 12, 1911, and in feminine handwriting, increases the trust fund set aside for the testator's daughters, Edith and Constance, from \$500,000 to \$1,500,000.

By a codicil executed May 11, 1910, at Cape Martin, France, in masculine

handwriting in which the testator advised that his children "should never forget the dangers attending the inheritance of a large fortune," Pulitzer left \$200,000 to "Eleanor Wickham, betrothed of my son Joseph, to be paid upon her marriage to my son."

Though it has been reported that Joseph Pulitzer chose his youngest son, Herbert, to carry out his policies on the World, the young man is still under age and the active management of the paper is confined at present to Ralph Pulitzer, the oldest son, who was elected last week president of the publishing company. Mr. Pulitzer was married some years ago to Frederick Webb. Her mother was a Vanderbilt.

FIRST WOMAN TO SLEEP IN JAIL

"Hiking Nell" Arrives in Elephant Butte and Spends Night in New Sanitary Concrete Lockup.

(Special Correspondence to the Herald) Elephant Butte, N. M., Nov. 20.—The town of Elephant Butte received more than its usual amount of excitement on Wednesday afternoon and night. "Hiking Nell" arrived in the afternoon. She was hungry and weary, having slept out the night before in the bosque up the river. She was provided with food. Later when Sheriff Putnam learned of her condition he interested Rev. W. C. Huell and the woman was provided with bedding, and as there were no quarters provided for women she slept in the jail. This is a new concrete structure and is thoroughly sanitary. "Hiking Nell" remained over till Thursday, when she started for Las Cruces. She was in Albuquerque a few days and is waiting for a wage of \$5,000.

The second incident of interest was from a report which stated that two men had broken jail at Deming and were headed for Elephant Butte. Sheriff Putnam and some others watched the bridge but failed to apprehend the fugitives. Some wanted to organize a posse and try and secure the reward of \$1,000 which was said to be offered, but the posse was not a success.
